

Workflow Guidelines

Rules:

- Workflows are extra credit; hence, they are not mandatory.
- You will receive credit only if the workflow is completed successfully.
- The instructions of each workflow will begin with its identification number, how many points it is worth, its deadline, and a list of prerequisite workflows if any.
- Workflows are not accepted after their deadline.
- If a workflow is cumulative (it has prerequisite workflows), it can only be done if you completed the prerequisite workflows successfully. It will also require you to upload the main section of its prerequisite workflows.
- Programs can only use the libraries `string`, `iostream`, `sstream`, `fstream`, `cmath`, `cstdlib`, `ctime` and the header files provided with the instructions. Likewise, you can use any other library the instructions permit.
- Workflow submissions must be uploaded to the GitHub repository directory its instructions are located in.
- Cheating of any kind is prohibited and will not be tolerated.
- Violating and/or failing to follow any of the rules will result in an automatic failure for the workflow.
